WEB DEVELOPER

megan sophia steblay

PROJECTS:

Blitz and Chaos
- Blitz and Chaos is a team-built, text-based, interactive story (run by JavaScript) providing you, the user, with a chance to play through a life as a hero. The choices you make along the way change the experience and outcome of your story.

- Languages: *JavaScript, CSS/Bootstrap, HTML*
- URL: https://justinean.github.io/BlitzandChaos/

Weather Dashboard Application
- A weather application. It was built in order to give users a way to check the weather and forecast for a specific city of their choice. It utilizes the OpenWeather API to provide up-to-date data and predictions. Additionally, it stores previous searches so that users can easily return to the weather predictions for cities.

- Languages: *JavaScript, CSS, HTML*
- URL: https://msteblu.github.io/WeatherDashboard/

JavaScript Quiz
- An application that runs a timed coding-assessment quiz about JavaScript fundamentals. It was built in order to test users' knowledge of JavaScript basics by asking them five questions — then storing individual users' high scores (using Local Storage) and ranking them in order to determine user progress.

- Languages: *JavaScript, CSS, HTML*
- URL: https://msteblu.github.io/CodeQuiz_JS/
